Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 29 May 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Specification

The abstract of the disclosure is objected to because it is not on a separate sheet

Correction is required. See MPEP § 608.01(b).

The disclosure is objected to because of the following informalities: 1) page 2, line 20 – “needle 100” should be --needle 101—and 2) the brief description of the drawings does not include Figures 1 and 2.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The device cannot both include the mandrel and the antenna since they separately inserted in the needle.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Longo (7,113,832) in view of Stadlmayr (Germany 2,124,684). Longo discloses the basic microwave

Art Unit: 3739

device including an antenna and needle. The reference fails to disclose a needle with a sharp tip and side opening. Stadlmayr discloses an electrode treatment device including a needle having a sharp tip with side ports to permit electrodes to laterally displace from the axis of the needle. Although plural needles are disclosed, Figure 7 shows the needle can include only a single side port. Given this teaching, it would have been obvious to the skilled artisan to use such a needle with the Longo antenna to allow lateral displacement to effect superior treatment. The use of a mandrel to effect tissue penetration prior to entry of a treatment electrode or antenna is well known in the art and would have been obvious to the skilled artisan to expedite insertion.

Response to Arguments

Applicant's arguments with respect to claims 5-8 have been considered but are moot in view of the new ground(s) of rejection.
